You are invited to take part in a community composting project on your estate. Come join a workshop and consultation at Myatts Field South Estate on **January 18th 2023 6.15 - 7.30pm**. We will discuss what a composting project might look like to you and support you to get started. Everyone is welcome and no previous skills required!

## Who are we?

Incredible Edible Lambeth (IEL) is delivering a Community Composting Project supporting Lambeth estate residents to divert their food waste from landfill. You will turn everyday food waste into free compost which can be used in community gardens and household plants, all whilst cutting carbon emissions!

## What's the plan?

Over the next two years, IEL will work with residents from 25 housing estates, providing information, skills, resources and community support needed to sustain community composting sites. IEL will provide all materials and support to build the compost bins. We will also:

- Hold consultation meetings
- Organise community building training
- Deliver how-to-build and how-to-compost workshops
- Provide caddies and composting tools
- Hold quarterly gatherings
